Objective

Highly motivated and skilled Junior Researcher with a robust background in mathematics, blockchain technologies, and artificial intelligence seeking to leverage extensive experience in data analysis, business intelligence, and Web3 technologies to contribute to innovative research projects. Skilled in quantitative analysis, data collection, and the interpretation of complex data sets to drive decision-making and strategic planning.

Education

European Business Institute of Luxembourg

Engineer's Degree, Artificial Intelligence, January 2023 - June 2023

European Business University of Luxembourg

Diploma, Blockchain Technologies, January 2022 - September 2022

Akwa Ibom State University

B.Sc, Mathematics, 2019 - 2023

Skills

- **Research and Analysis:** Proficient in conducting comprehensive surveys, organizing and analyzing data to extract valuable insights.
- **Blockchain and Al:** Knowledgeable in blockchain analysis, smart contracts, Al, and Metaverse development.
- **Quantitative Skills:** Strong mathematical background with experience in solving complex problems.
- **Technical Tools:** Proficient in using various data analysis tools and programming languages relevant to blockchain and AI research.

Certifications

• Introduction to Generative AI with Google Cloud

Professional Experience

Pixelette Technologies LTD, London, UK

Business Intelligence Analyst, February 2024 - Present

- Leading projects in Blockchain, AI, and Metaverse Development.
- Analyzing data to inform business strategies and improve operational efficiency.

Infrastructure Masons

Data Analyst, June 2023 - Present

- Leading the Liquid Cooling Initiative for the innovation committee.
- Conducting surveys and analyzing data on Liquid Cooling Technology adoption in data centers across Europe and America.

National Information Technology Development Agency (NITDA), Abuja, Nigeria

Blockchain Mentor, September 2022 - December 2023

- Mentored individuals in creating and minting tokens and NFTs, building and deploying smart contracts.
- Analyzed and created content on crypto projects, contributing to the development of the metaverse and gaming.

Beneno International School

Mathematics Teacher, January 2016 - November 2019

- Taught and developed mathematics curriculum for various grade levels.
- Enhanced students' analytical, problem-solving, and quantitative skills.

Summary

A dedicated Junior Researcher with a passion for exploring new technologies and methodologies in the fields of blockchain and artificial intelligence. Brings a unique combination of analytical skills, mathematical expertise, and hands-on experience in data analysis and Web3 technologies. Eager to contribute to cutting-edge research projects and drive innovation.
